

ATTRactions

- Formulate clear PICO questions
- Design robust search strategies (PubMed, Embase, etc.)
- Use reference managers (Zotero, EndNote)

- Systemically screen studies (Rayyan)
- Design data extraction forms
- Assess methodological quality (e.g., Cochrane RoB 2.0)

- Calculate pooled effects
- Interpret Forest & Funnel plots
- Evaluate heterogeneity
- Apply PRISMA guidelines for publication

EVENT OVERVIEW

This webinar provides a structured, hands-on introduction to conducting high-quality systematic reviews and meta-analyses using REVMAN 5.0 software. By combining methodological standards (such as PRISMA guidelines and Cochrane frameworks) with practical demonstrations, participants will learn how to convert a research idea into a publishable evidence synthesis.

Event Details

- Date: Nov 18-20, 2026
- Time: 06:00 PM – 08:00 PM
- Platform: Zoom
